

ManessHypnosis

Hello Friend,

Hi my name is Will, my partner is Sean, and we are extremely glad you have taken an interest in improving your life. Our services include private sessions with people one-on-one using coaching and hypnosis to help them achieve their goals.

Now before you wonder what the hell, this guy does hypnosis?

I know it's not exactly a typical approach right?

Few people know that hypnosis is just a trance state between your fully alert state and sleep. This is a state that is very important in improving your life as will see below in this free guide I'm offering you here on the:

5 Misconceptions About Hypnosis That Society Doesn't Want You To Know

What Can Hypnosis Do For You?

What you need to know is that we use hypnotic tools to help our clients find and change limiting beliefs and behaviors. In doing so, they can create more joy and fulfillment in your life. This means you will be motivated to start taking action on your goals and dreams.

Would you like to know what you can achieve with hypnosis? It's hard to tell with so many claims out there!

Know that hypnosis is not for broken people. In fact, we don't work with the types of people that generally go to psychologists or counselors. We work with people that function, but want to improve and even thrive! We also work with people that are having a rough patch and want to change behaviors and limiting beliefs.

Warning: Most hypnotists advertise services, which they are not remotely qualified to perform.

This is because things like addiction and depression are way beyond the legal scope of practice for hypnosis professionals. Practitioners advertising such services are taking a legal risk. That is the first issue with hypnosis as an industry. Hypnosis is often marketed like psychotherapy, which it is not.

We can help you avoid hiring someone who does not have the qualifications to help you, even if you don't buy our services.

Hypnosis can help people achieve goals and solve problems in their lives faster than you ever thought possible. It is one of the only tools that can help people create permanent change.

Why is this?

Think back to a time you made a big change in your life. Didn't you have to do some inner reflection to create that big change? Inner reflection, like when you recall past events or make new distinctions, is a light trance. Such inner reflection is also known as a form of hypnosis. The brain actually updates itself using the trance state.

Such a method of self-improvement is like upgrading a computer. Hypnosis has helped me lose 110 pounds, keep it off for 9 years now, and create a business I love. My whole family is obese, yet I accomplished a healthy sustained weight loss by changing my subconscious mind. You can hear more about this on our DVD offered below. Our uniquely designed hypnosis system has also helped our clients achieve goals from business success, confidence, stress-reduction, improved health, and weight reduction.

Before you can be truly free in life, you must be emotionally free. Hypnosis can help you do that!

Our hypnosis system is specifically designed to be the most effective way to achieve results. Guaranteed!

Maness Hypnosis stands for permanent positive change. We are the only hypnotists we know of in Texas that have a guarantee of satisfaction. If you follow our four simple guidelines, we guarantee your satisfaction of the experience. If you are not 100% satisfied, we will provide a full refund! No questions asked.

Just look at these 5 misconceptions and learn more about what we do. At the end, we will give you some options if you are ready to take the next step.

5 Misconceptions People Have About Hypnosis That Society Doesn't Want You To Know

With this information you can make an effective an intelligent, informed decision on whether hypnosis can help you get the results you are seeking in life.

Misconception #1—That Hypnosis is unnatural

In actuality, hypnosis is a natural state of mind with numerous benefits. Increased relaxation of the nervous system, and reduced stress and tension, are both important benefits of our work. But, the most important benefit is profoundly increased communication with your subconscious mind.

The subconscious mind is the part of the mind that runs all the patterns of behavior in your life, many that you may not even consciously remember. Some of them may even be ruining the quality of your life. Identifying such limiting patters of thought is something properly trained hypnosis professionals can help you with.

Misconception #2—That Hypnosis is Manipulation or Mind Control

Most people think that working with a hypnotist on a goal is like stage hypnosis. Society generalizes all hypnosis as Stage hypnosis. Stage hypnosis misleads people into thinking the hypnotist is controlling someone through hypnosis. You will soon learn first-hand; you cannot be hypnotized if you do not want to be.

You will not do anything in hypnosis that you would not do in your fully alert state. No acting like a chicken or any of that nonsense. It is simply a natural state of mind with increased access to the subconscious mind to input positive suggestions and clear negative past trauma. If you do not trust the person you are working with, you will not go into hypnosis and you will not respond to the suggestions. Therefore, it is imperative that you trust the person you are working with.

Misconception #3 - Self-hypnosis alone creates results for people long term

Self-hypnosis is a very powerful method of personal change that can be very effective. You can actually learn to hypnotize yourself but the thing is, most people's challenges have a deeper root cause that we are all are often unaware of. As you know it is easier to see other people's problems than your own.

This prevents any self-applied hypnosis method from being effective long term. This is why for the best results, working with a professional is recommended.

Misconception #4- Change in hypnosis happens in one session

Many people think one or two hypnosis sessions can cure almost anything. Hypnosis used within the appropriate scope of practice, gets quick results.

The thing is, the results tend to wear off unless you do 6-12 sessions with a properly trained professional and listen to customized hypnosis reinforcement recordings daily. You didn't create your current situation overnight and you won't change it overnight, either.

Misconception#5 -Hypnosis does not require work

When you work with a professional hypnotist on a goal within the scope of practice, you will find yourself doing the actions that will achieve your goals quicker than you ever dreamed of.

However, you still have to do the weekly action step to build momentum from week to week.

With this information, you can make an effective an intelligent, informed, decision about whether hypnosis could help you make a major change in your life.

I want to offer you a very special GROUNDBREAKING 45 min long DVD. It is completely free, including shipping to your home. It includes:

- The Secret You've Been Looking For Your Whole Life--The secret to how your subconscious mind creates your results in life.
